

Every child in the UK is entitled to a free two-year progress check

This is an invaluable tool provided by your health visitor and/or child's nursery.

- It **helps** you to understand if your child is meeting their age-expected milestones
- It **identifies** early developmental needs and the provision of prompt support
- It **ensures** children have a good level of health and development

The AKEB is here to help

For more details on how to understand and engage with this crucial process, please contact us at
